

# EoleWrap

STANDALONE

## The Magic On-Prem Interface for your FFmpeg

FFMPEG MADE SIMPLE FOR MEDIA OPERATORS AND PRODUCTION TEAMS

EoleWrap Standalone brings the power of FFmpeg to every media professional through an intuitive user interface.

Compatible with any FFmpeg version, it lets you easily create and share presets, trim content, apply logos and ready-to-use filters, launch batch transcoding jobs and monitor jobs in real time, all from a single application designed to simplify media operations and boost productivity.

# EoleWrap

The Magic On-Prem Interface for your FFmpeg

## Key Features

### 1 FFmpeg Commands Library

Easily build customized FFmpeg command templates through a user-friendly interface. Export & share presets, making transcoding accessible to every user.

### 2 Timeline-Based Media Editing

Upload and manage multiple videos, define precise In/Out timecodes, and easily extract content segments from an intuitive timeline.

### 3 Ready-to-Use Filters

Apply preconfigured FFmpeg filters instantly: logos, positioning, rotation, mirroring, audio adjustments and muting.

### 4 Frame Accurate Video Player

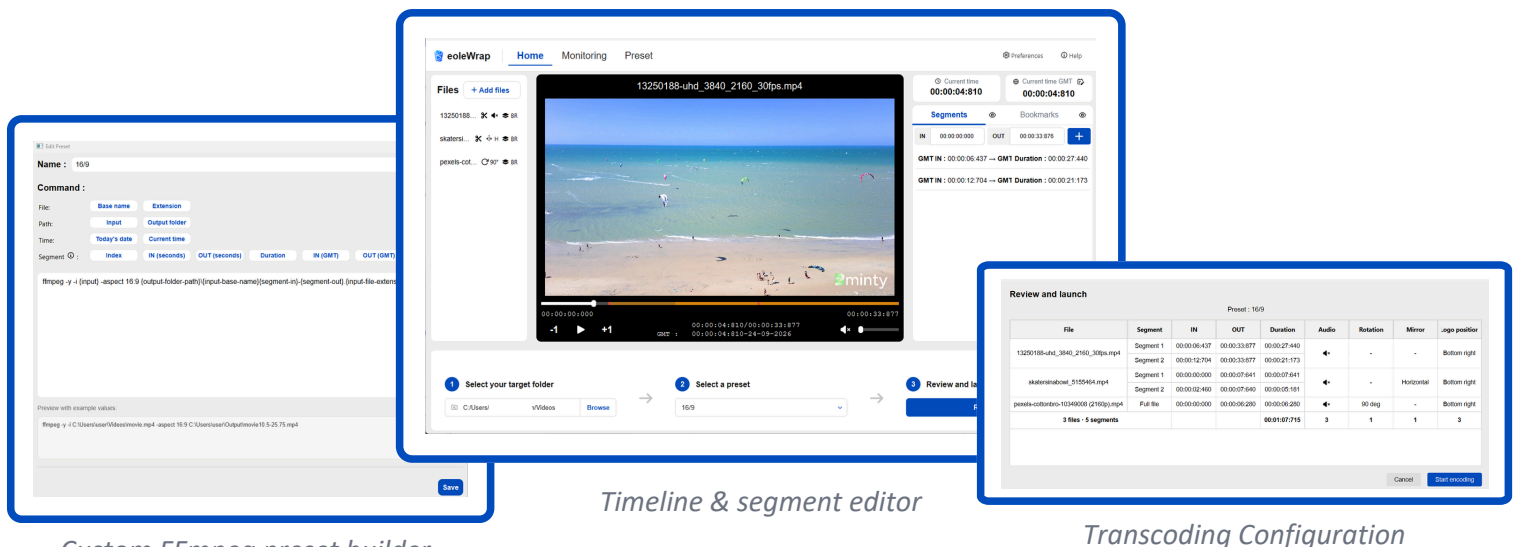

Preview content in real time before launching transcoding jobs.

### 5 One-Click Transcoding Job

Apply presets, launch batch transcoding jobs, and automatically export processed assets to user-defined destinations.

### 6 Real-Time Monitoring Interface

Review transcoding configurations before launch, then track processing progress with complete visibility.

## Key Benefits

### SIMPLIFY FFMPEG OPERATIONS

Give every operator access to the full power of FFmpeg through an intuitive interface, with seamless integration to any FFmpeg version.

### INCREASE PRODUCTIVITY

Clip, brand, preview and transcode content from a single application.

### CONTROL COSTS

Access powerful FFmpeg capabilities through flexible subscription or Capex-based licensing models.
